REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The present application relates to a display panel adopting the structure that conductive members surrounding a potential introducing terminal are disposed on both sides of a substrate, the potential introducing terminal is applied with a potential higher than those applied to the conductive members and a discharge suppressing mechanism is provided between the potential introducing terminal and at least the conductive member mounted on the surface of the substrate constituting an outer surface of the display panel. The prior art of record does not teach or suggest the second conductive member surrounding the potential introducing terminal, and the charge suppressing structure formed between the potential introducing terminal as are claimed in claim 1, the second conductive member surrounding the potential introducing terminal, and an exposed surface between the potential introducing terminal and the second conductive member is covered with an insulating substrate as are claimed in claim 2, and the second conductive member surrounding the potential introducing terminal, and projections on an exposed surface between the potential introducing terminal and the second conductive member as are claimed in claim 3.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
